PROFILE SUMMARY

Specialized in creating intuitive interfaces that seamlessly blend aesthetics with functionality. Skilled in HTML, CSS, JavaScript, TypeScript, React, Redux, I thrive in collaborative environments, leveraging my expertise to drive projects from conception to polished execution. Committed to staying updated with evolving industry trends and passionate about delivering high-quality, responsive web solutions that elevate user satisfaction.

TECHNICAL SKILLS

JavaScript, HTML, CSS, React, TypeScript, Agile/Scrum, Jira, GitHub, Redux, Hooks, RESTful API, Firebase, Netlify, Node.js, UX/UI Design, Bootstrap, MUI, Unit test, Jest, React Testing Library

SOFT SKILLS

Empathy, Time management, Communication, Problem solving, Team collaboration, Accountability

PROFESSIONAL EXPERIENCE

Arzan Cafe | Front-End Developer | Chicago, IL

September, 2023 - present

- Designed and built a responsive, interactive website using TypeScript, React and Next.js.
- Implemented features like dynamic menus, online ordering system, and user interface optimizations.
- Conducted thorough testing and debugging to identify and resolve issues, ensuring a smooth and error-free user experience.
- Actively participated in regular team meetings and code reviews to discuss project progress, share insights, and brainstorm solutions for technical challenges.

Cargo Fleet | Front-End Developer | Chicago, IL

May 2022 - September 2023

- Developed fleet management software that helps to improve productivity and efficiency of the cooperation of document management systems.
- Improved UI/UX, built single-page, user-friendly, responsive web pages using React, HTML and CSS.
- Manipulated and built UI with data from Rest API endpoints, using higher order functions.
- Optimized performance of app rendering and reliability by 10% in a team of 7 developers.

CultureLink | Marketing Associate | Toronto, ON

April 2021 - May 2022

- Provided IT support to 83 employees, addressing hardware and software issues, resulting in a 90% faster issue resolution.
- Conducted in-depth user research to understand our target audience, needs, and pain points. Use this research to inform the website's redesign. Conducted testing of the website and gathered feedback.
- Collaborated with the team to re-design our website using WordPress, ensuring a modern, user-friendly, and responsive design.
- Utilized WordPress skills to implement the design, ensuring it is fully functional, responsive, and optimized for performance.

PROFESSIONAL PROJECTS

- Incorporated user authentication features using Firebase, enabling secure login, registration, and personalized user profiles.
 - Developed a dynamic product catalog that allows users to browse through a collection of books, complete with detailed information, cover images, and user reviews. Implemented a fully functional shopping cart system, enabling users to add, remove, and modify items seamlessly.
 - Integrated Redux for efficient state management, ensuring a smooth shopping experience.
 - Leveraged API to fetch data, such as book details, pricing, and availability, ensuring the website remains up-to-date and reflects accurate information.
-
